

Nguyen Ho Tuan Tinh

PHP Developer

Name Nguyen Ho Tuan Tinh

Birth 28/03/2000

Phone +84355947555

Email iamtinhr.contact@gmail.com

Address Nguyen Van Qua, Ho Chi Minh

Portfolio <https://tinhr.com>

OVERVIEW

PHP/Laravel Developer with over 4 years of experience building and maintaining production web systems.

I have hands-on experience in developing RESTful APIs, designing modules, optimizing databases, using Redis caching, working with queues and schedulers, and integrating third-party services.

I have contributed to the development of an LMS system serving over 1,000 concurrent users, with features such as real-time chat, SSO, data reporting, and complex backend business logic.

My current career direction is to grow deeper as a Laravel Backend Developer. I focus on writing clean, stable, scalable, and maintainable code.

WORK EXPERIENCE

03/2024 – 04/2026

ITECHCO LLC

- Developed and optimized an E-learning / LMS system serving over 1,000 concurrent users, ensuring good performance and stability in production.
- Designed and built a module-based architecture with Laravel, improving system scalability and making the codebase easier to maintain.
- Optimized MySQL queries with indexing and used Redis caching for frequently accessed data, helping reduce database load and improve system response time.
- Integrated third-party services such as Microsoft Azure, Google Cloud, Zoom, and Microsoft Teams to support online learning and real-time interaction.
- Built real-time chat features using Socket.IO.
- Integrated Social Login and SSO with Google, Microsoft, and Apple.
- Built Excel export and reporting features.
- Worked closely with BA, Designer, and Tester teams throughout the project lifecycle, using GitLab and Base.vn for source code management and task tracking.

11/2021 – 03/2024

Freelancer (Full-stack Developer)

- Developed full-stack web applications and optimized performance from database indexing to frontend page loading speed and SEO.
- Built backend features with Laravel, including Eloquent, Middleware, Queue, and Scheduler.
- Implemented real-time solutions such as Socket.IO, Laravel Echo, and Redis for interactive web systems.
- Designed, tested, and documented RESTful APIs using Swagger and Postman.
- Integrated automated payment systems, including banking and crypto payment solutions, with a focus on stability and security.
- Maintained and upgraded existing systems, and developed new features based on project requirements while ensuring delivery quality and timeline.

EDUCATION

09/2019 - 05/2022

Vietnam–Korea University of Information and Communication Technology – VKU

Major: Information Technology — Specialized in Web Development

TECHNOLOGY & SKILLS

- **Backend:** PHP Laravel, Node.js, NestJS, Express.js, JavaScript/TypeScript, RESTful API design and development.
- **Database:** MySQL, MariaDB, Redis.
- **Frontend:** HTML, CSS, Bootstrap, Tailwind CSS, jQuery, basic knowledge of React.js and Next.js, enough to work with frontend teams and make UI adjustments.
- **Deployment & Infrastructure:** Git, GitHub, GitLab, branch management, merge workflow, code review, VPS, Ubuntu, CentOS, Nginx, Redis caching.
- **Tools:** VS Code, PhpStorm, WebStorm, Navicat, Postman.
- **Project Management:** GitHub, GitLab.
- **AI Tools:** Claude Code, OpenAI Codex, GitHub Copilot, Cursor, used to support coding, refactoring, debugging, code review, and improving the development workflow.
- **Soft Skills:** Good communication and collaboration with BA, Designer, and Tester teams; code review, technical support, documentation, and solution presentation.

FEATURED PROJECTS

TANGLIKEGIARE.TOP

(11/2023 - 02/2025)

Client	TANGLIKEGIARE.TOP
Descriptions	Built and operated a platform that supports social media engagement growth across multiple platforms, using automation solutions to improve efficiency and scalability.
Number of members	1
Position	Product Owner, BA, Full-Stack Developer, Tester
Responsibilities	Handled the full project lifecycle from end to end, including requirement analysis, development planning, implementation, deployment, and product quality assurance.
Technology in use	<ul style="list-style-type: none">• Built and operated a digital service order management platform with third-party API integration, automated payment processing, queue handling, and a real-time customer support system.• Built real-time features such as instant transaction notifications and a customer support ticket system, improving user experience and interaction.• Optimized SEO and developed multi-language and multi-currency features to support international users.• Backend: Laravel, MySQL, Redis• Frontend: HTML, CSS, Bootstrap, jQuery

URL Shortener Website

(05/2026 – 06/2026)

Client	URL1S.COM
Description	Built a URL shortener website that supports short URL creation, redirection, link management, and access statistics. Used AI coding tools to support development, refactoring, debugging, and improving the coding workflow.
Number of members	1
Position	Laravel Developer
Responsibilities	Owner / Full-stack Developer
Technologies Used	<ul style="list-style-type: none">• Frontend: React, Tailwind CSS• Backend: Laravel, MySQL, Redis
